

Introducing Crestwood Preparatory College's Maximizing Academic Performance Program (M.A.P.P.)

Since its inception Crestwood Preparatory College has enriched the lives of our students with learning approaches and programs that maximize achievement and post-secondary prospects. We understand that added student support is essential to the success of our students. Much of what we do, day-to-day and class-to-class, is part of this overall teaching approach. By teaching the skills and strategies to learning, we are enhancing one of the most outstanding academic programs in the City of Toronto.

It is for these reasons that we are proud to introduce our Maximizing Academic Performance Program (M.A.P.P.) for the 2010-2011 school year. M.A.P.P. provides a supportive environment where students can overcome academic challenges, embrace opportunities encountered through their unique learning styles, and meet their goals. The M.A.P.P. offers every student the tools and confidence to reach their maximum potential. There are several components to M.A.P.P. ; some have existed for years, while others have been recently introduced.

- **Grade 7, 8 and 9 M.A.P.P. Centres:** daily after school homework and academic centres where teachers assist students in homework, organizational and study related areas.
- **Grade 7 “Integrated Study Skills” Course** – part of the regular program and schedule for all grade 7 students.
- **Math Tutoring Centre** – teacher and peer assistance for all grade levels.
- **English Writing Centre-** opportunities for students with writing challenges or inquiries to get assistance from English teachers.
- **Mentoring Programs-** regularly scheduled meetings with teachers and mentor groups- more individualized program for students with greater need.
- **Optional GLS/GLE Study Skills Course** in Grade 9.

Crestwood Preparatory College's Maximizing Academic Performance Program, your road to success at high school and beyond.
